PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience, specializing in front-end development and also strong in the back end. On the front end, I build fast, responsive, SEO-friendly websites with React.js, Next.js (SSR/SSG), Vue.js and TypeScript, with a focus on clean component architecture and performance. On the back end, I build REST APIs and database-driven systems with Node.js, Express.js, MongoDB, Laravel (PHP), MySQL and PostgreSQL, including JWT / OAuth authentication. Delivered 300+ websites, from AI product websites and ecommerce stores to food ordering and travel booking sites, plus WordPress / WooCommerce stores. Looking for a full-stack role with a front-end focus, where I can own features from the interface to the database.

SKILLS

- React.js
- Next.js
- Vue.js (Quasar)
- TypeScript
- Tailwind CSS
- Bootstrap
- JavaScript
- TanStack Query
- Redux Toolkit
- Pinia / Vuex
- HTML / CSS
- REST API Integration
- Node.js / Express.js
- Laravel / PHP
- MongoDB
- MySQL / PostgreSQL
- WordPress / WooCommerce
- Socket.io (Real-time)
- Social Login / OAuth
- JWT / RBAC
- AI Tool Integration
- Git / GitHub
- Responsive Design
- SEO & Performance

EXPERIENCE

Software Engineer at **Streamed Inc** (Onsite) *Oct 2025 – Present*

- Build and maintain scalable, responsive websites using Vue.js, React.js, Next.js, TypeScript, Tailwind CSS, Pinia, and TanStack Query.
- Build reusable components and integrate REST APIs for dynamic website content.
- Implement social login (OAuth) and authentication flows on websites.
- Build full-featured ecommerce websites, including product configurators, subscriptions, cart and orders, by integrating APIs.
- Optimize SEO and performance using Next.js SSR/SSG for fast load times and high search visibility across mobile and desktop.

Frontend Developer at **Tossdown Technologies Pvt Ltd** (Onsite) *2024 – Nov 2025*

- Delivered 300+ websites — ecommerce websites, food ordering websites, static sites, and charity/foundation pages — using React.js, Next.js, HTML, CSS, JavaScript, and Bootstrap.
- Integrated REST APIs for real-time order management and dynamic content delivery; built and customized WordPress blogs and content pages for multiple client brands.
- Key projects: Jalal Sons (ecommerce & retail), Burger Bloc (food ordering), Amlux Travels (travel booking), WeeCommerce Canada, and the Tossdown website.

Front-End Developer at **Nodesol Corp** (Onsite) *2022 – 2023*

- Built responsive, cross-browser user interfaces using Vue.js (Quasar), React.js, HTML, CSS, Tailwind CSS, and Bootstrap under senior mentorship.
- Gained strong professional foundations in modern front-end frameworks, component architecture, state management, and API integration.
- Optimized UI performance and maintained/enhanced existing production codebases while collaborating with cross-functional teams to meet deadlines.

Full-Stack Developer at **Freelance & Personal Projects** *2024 – Present*

- Developed full-stack websites independently using React.js, Next.js, Node.js, Express.js, and MongoDB — handling UI, backend APIs, and database design end-to-end.
- Built Laravel (PHP) websites with MySQL/PostgreSQL, including authentication, CRUD modules, admin panels, and API endpoints.
- Built and customized WordPress websites including theme development, plugin configuration, blog management, and content pages for various clients.
- Delivered ecommerce stores, portfolio sites, and business landing pages with a focus on performance, responsiveness, and clean UI.

Ingeniors — Company Website & Internal Website (PHP MVC)

- Built and deployed the ingeniors.com website and an internal PHP MVC website (oms.ingeniors.com) on its own subdomain.

PROJECTS

ORCHIT – AI Workspace Website (Vue.js) | *Streamed Inc* | *2025–2026* | orchit.ai

- Worked on the front-end of the Orchit website (orchit.ai), a workspace for projects, tasks, email, calendars, notes and files with AI assistants.
- Responsive website pages built with Vue.js, TypeScript, and Tailwind CSS.

Goodiset – Swedish Candy Ecommerce Website (React.js / Next.js) | *Streamed Inc* | *2025*

- Full-featured ecommerce website for the #1 Swedish candy store in UAE & Dubai (goodiset.com), serving GCC-wide delivery.
- Includes Pick & Mix configurator, Gift Box builder, Candy Subscription, brand category browsing, and optimized checkout flow.
- Implemented Next.js SSR/SSG for SEO optimization and fast performance across mobile and desktop devices.

INGENIORS OMS – Operations Management System (PHP / MVC) | *Freelance* | *2026*

- Custom PHP MVC website for internal company operations (oms.ingeniors.com), with secure email/password login, remember-me and password reset.
- Deployed to a dedicated subdomain running alongside the main company website.

INGENIORS – Product Design & Mechanical Engineering Services Website | *Freelance* | *2026*

- Corporate website (ingeniors.com) for a US-facing engineering studio, with service pages, capabilities, case studies and an interactive project portfolio gallery.
- Responsive dark-themed UI with SEO metadata and a contact / RFQ flow.

TippyCart – Multi-Category Ecommerce Store (WordPress / WooCommerce) | *Freelance* | *2026*

- Built a responsive WooCommerce store (tippycart.com) covering home, fitness, pet, outdoor and electronics categories, with product variants, wishlist, quick view, cart and customer accounts.
- Created the homepage with Slider Revolution banners, category grids and best-seller product sections.

3G Leather – Leather Goods Ecommerce Store (WordPress / Elementor / WooCommerce) | *Freelance* | *2026*

- Built an online store (3gleather.shop) for handmade leather bags, wallets, gloves and jackets, with category browsing, sale pricing, wishlist, product compare, quick view and gift cards.
- Designed the storefront with Elementor and the WoodMart theme: hero banners, product collections, product videos and a country/currency selector.

Vue-Project – E-Commerce UI (Vue 3 / TypeScript / Tailwind CSS) | *Personal Project* | *github.com/Ayehsa-Siddiqa/Vue-Project*

- Modern e-commerce interface with responsive design, product listing, category section and custom icon styling.

Jalal Sons – E-Commerce & Retail Website | *Tossdown Technologies* | *2025*

- Responsive UI for product listings, cart, and checkout; integrated APIs for real-time product and order management.

Burger Bloc – Food Ordering Website | *Tossdown Technologies* | *2025*

- User-friendly UI for menu browsing and ordering; integrated third-party APIs for cart/order processing and WordPress blog management.

Amlux Travels – Travel Booking Website | *Tossdown Technologies* | *2024*

- Responsive UI for tour listings, booking features, and inquiry forms with dynamic content handling across devices.

WeeCommerce – Women Entrepreneur E-Commerce (Canada) | *Tossdown Technologies* | *2024*

- Developed frontend using HTML, CSS, JavaScript, and WordPress; responsive layouts for small business ecommerce.

EDUCATION

BS Computer Science – Govt College University Faisalabad *Sep 2019 – Jul 2023* | *CGPA: 3.62*

Certificate in Computer Applications & Office Professional – Punjab Vocational Institute (VTI), Kanganpur | 2021–2022
